Abstract

Tough times and Miles to go before we sleep- Corona warriors. Challenges have become more commonplace in the situation of Covid-19. While on one hand people across India and around the globe are restricted to their homes with a complete shutdown of businesses and educational institutions to contain the virus, but some warriors are who are fighting against this pandemic. We have clapped, clanged utensils lit diyas to salute their bravery. Children of frontline coronavirus disease-2019 warriors are facing many problem which can't explained easily. Doctors, Medical staff members, policemen, and Asha workers are engaged in different duties in fight against COVID-19. These are the Frontline of this war against COVID-19. There is another side. Every doctor every policeman and every health personal has a different fight besides this pandemic. They are Doctors, Farmers, policemen, and health workers but they are also human and have a family. Despite that, they work to keep us safe. They are not only facing a daunting task of handling and treating patients but also struggling to keep their own worries and emotional stress. First came to doctors nurses ward boys pathologists pharmacists etc. As striker norms came to the fore. Lots of them have risked their lives in the commission of humanity. The inspiring stories of these medical heroes who sacrificed their lives on the forefront to fight against the virus are heartbreaking at the same time. The sacrifices of these fighters will no go in vain. Humanity will always be grateful for their sacrifices during this hardship. The respect for them has grown manifold in the hearts of people. Through this research paper, we tried to give a tribute to these Corona warriors.

Keywords: COVID-19, Corona warriors, pathologists, pharmacists, Humanity, tribute.

INTRODUCTION

A tribute to frontline corona warriors--Doctors, Nurses, sanitisation worker, police, asha workers who sacrificed their life while saving patients during the ongoing COVID-19 pandemic. As we all know it that the year 2019-2020 coronavirus is upending life on a global level. The highly infectious virus disease covid-19 is caused by SARS-CoV-2 (Severe Acute Respiratory Syndrome-Coronavirus-2)

It was first seen in Wuhan, Hubei, China where it was firstly identified in December 2019. On March 11, 2020 after almost 3 months the WHO (World Health Organisation) recognized it as a pandemic across the world.

In India the Prime minister March 22, 2020 was announced as the Janata curfew urges for resolve, restraint to fight coronavirus. And on March 24, 2020 the government of India has announced the lockdown for 21 days as phase 1 and extended till May 31, 2020 in four phases.

On July 08, 2020 WHO acknowledge 'evidence emerging' of airborne spread of COVID-19.

As of August 18, 2020, approximately 22,185,755 cases of COVID-19 have been confirmed in all over the world and resulting around 780,369 deaths. While on one hand all around the world everything is shutdown whether its education institution, businesses but on the other hand doctors, police, medical staff are leading the COVID-19 battle from the front line.

"Watch me.

I will go to my own sun and if am burned by its fire i will fly on scorched wings!!! (CORONA WARRIORS).

Warriors against the COVID-19

There is no need to say, that doctors, nurses, police officers, sanitisation worker, asha worker are at high risk of infections. COVID-19 frontline have risked not only their lives, but their family members.

Dr. Li from China

His face became a freedom of speech in China. He died of the illness he warned against at age 34. He was an ophthalmologist in Wuhan. On December 30, 2019, Li signed onto his medical school alumni chatroom and posted a warning against going around that resemble SARS. In the middle of the night Chinese authorities took him to the police station and forced him sign a statement saying that his warning was an unfounded

rumor. Only then he was allowed to return his work. On January 10, 2020, he treated a woman for glaucoma, without knowing that she was infected with coronavirus. Li was diagnosed 2 weeks later. He eventually decided to go public about his experience. He criticized the inaction of the Chinese government, continued leaking the information about the virus. On February 7, 2020, Dr Li passed away.

Dr. Frank Gabrin from America

America's first ER doctor to die in the frontline of the COVID-19 battle.

Doctors from Italy

Many of the doctors died in Italy till now in this pandemic situation. This couple is one of them

A couple from Italy, both of them saved the life of 134 by working hard day and night, but on the eighth day itself, they became a victim of disease.

(Wikipedia)

Roberto Tonelli and his fiancé, Ivana Castaniere were planning their wedding in Italy. Now they're fighting Coronavirus on the frontline together.

September - November 2020

During this pandemic, many Covid-19 warriors are risking their lives to ensure that everyone stays safe as the country fights the deadly virus—Dr Brijal Patel is one of them. Seven months pregnant on COVID-19 duty. Dr Brijal Patel, a medical officer in Ahmedabad, developed symptoms of Covid-19 but tested negative twice, and resumed duty to serve society.

My brother Dr. Sumit Singh works at Gangasheel Hospital in Bareilly, working hard day and night treating their patients. He doesn't come home for 3-4 months and missed Rakhi festival too. On duty, his colleague's report was positive, but when he was tested, his report was negative, and he resumed duty to serve society. A doctor from Madhya Pradesh made his car a temporary house to save his family from COVID infection. More than 196 doctors died in India.

Warriors in khaki

The COVID-19 pandemic has taken the world by a storm. In the fight against COVID-19, more than 100 policemen have been tested positive for the infection while four policemen have lost their lives and the number is expected to rise.

New avtar of force

(Wikipedia)

The force have found many entertaining ideas to convey their right message to the public.

Sub-Inspector (SI) Harjeet Singh of Punjab Police has emerged as a shining symbol of the nation's fight against the coronavirus.

Kerala Police has also come out with a hand washing dance.

Bengaluru and Mumbai Police has come with innovative unique theme helmet.

In Andhra Pradesh, police officers singing song. The song proposes ways to tackle the virus and promises citizens that they will be able to step outside and see the light of day after this pandemic subsides.

In these odd times, the khaki remains at forefront of not only implementation of the law but also social welfare and social defence.

Asha workers as corona warriors

In Mysuru, Over 1,800 ASHA (Accredited Social Health Activist) workers attached to the District Health Department have lent shoulder to the Government in the battle against Coronavirus.

ASHA workers have identified themselves as Corona warriors by visiting homes of all those who are under quarantine and collecting vital statistics, that is very much useful in the fight against the pandemic situation.

On one hand Doctors, medical staff are engaged in taking care of COVID-19 from inside the hospital, while on another hand asha worker are carrying out the outdoor task of visiting households, checking out the health of the people who are under isolation and quarantine and collecting data about persons who are symptomatic and those who were in primary and secondary contacts with the infected, while risking their own health.

Asha worker task is to advise people stay in indoor and educate them hand-sanitisation and wearing mask.

FINAL WORDS

I appreciate the doctor, police, Medical staff and all corona warriors for their hard work and bravery fighting to COVID-19. They are not only risking their own life but their family are at high risk, which is indeed a huge sacrifice.

“Not all soldier carry a gun to protect their country.....
Some carry a stethoscope!!! “
